

NAME: Achille
SURNAME: PICH
PROFESSION: MD, Associate Professor of Pathology
DATE & PLACE OF BIRTH: June 16, 1949; Nole (Torino), Italy
CITIZENSHIP: Italian

1974: Degree in Medicine (M.D.).
1977-85: Assistant Professor of Pathology, Faculty of Medicine, University of Turin.
1985-2019: Associate Professor of Pathology, Faculty of Medicine, University of Turin.

BOARD CERTIFICATION:

1974 Medical License, Italy (summa cum laude)
1982 Board in General Surgery, Italy (summa cum laude)
1986 Board in Laboratory Medicine, Italy (summa cum laude)

CLINICAL PATHOLOGY ACTIVITY:

1974-present General Clinical Pathology Physician, University of Torino Medical School and “San Giovanni Battista Hospital”, Torino, Italy
Specialty fields: Hematopathology (Bone marrow)

MEMBERSHIP

SIAPEC since 1995.
IAP since 1988.
ISPO (International Society for Preventive Oncology) since 1993.
EBMWG (European Bone Marrow Working Group) since 2007.

2010-2019 Director of the Residency Program in Surgical Pathology of the University of Torino-University of Novara (Eastern Piedmont).

- 2) Case Reports in Pathology

SCIENTIFIC ACTIVITY

Research on tumor cell proliferative activity, oncogene expression, hematopathology (especially bone marrow pathology), mammary (especially male breast) and cervical pathology, experimental pathology and angiogenesis.

Main research topics (and major scientific achievements): Identification and localisation of milk proteins in dysplastic and neoplastic mammary lesions. Histological and immunohistochemical characterization and prognosis of male breast cancer. Angiogenic activity of hyperplastic and neoplastic lymphoid tissue. Role of HPV in the evolution of condylomata and dysplasias of the uterine cervix. Prognostic value of the proliferative activity in pharyngeal, bladder, prostate and male breast carcinomas, multiple myeloma and thymoma. Prognostic and predictive value of AgNORs in acute myelogenous leukaemia (Pich et al. J Clin Oncol 16,1512-8,1998, selected for the 2000 Year Book of Pathology) and adult acute lymphoblastic leukemia. Prognostic value of p53 expression in thymoma, lymphoma and male breast carcinoma (Pich et al. J Clin Oncol 18,2948-56,2000, selected as "Article of the day" October 12, 2000 by AMEDEO, The Medical Literature Guide). Prognostic value of the expression of WT1 gene transcript in adult lymphoblastic leukemia. JAK2V617F mutation in RARS-T, chronic myelomonocytic leukaemia and essential thrombocythemia. JAK2V617F, CALR and MPL mutations and bone marrow histology in essential thrombocythaemia. Role of Wiskott–Aldrich syndrome protein (WASP) as a tumor suppressor in T cell lymphoma.

Author and co-author of 197 scientific publications.
